

PETERSEN GR. 6

Coming Up

Chess and Brain Science

Hi there, hope everyone is having a great start to their March!

We have just concluded our Math units in Measurement (units and Perimeter) and Geometry (angles and angle relationships and measuring) and we will beginning our Number Sense unit with the focus of Fractions and using decimals.

Also, our class has been playing chess (and learning to play chess :) The above infographic explains the overall benefit of playing chess and the increased “brain power” that comes with it.

We will beginning our dance unit which will be focused on movement, beat, and rhythm. The students will be creating their own Zumba routines that will be lead and performed in class.

The best way to get a hold of me is through email (adam.petersen@granderie.ca) or calling the school (519-752-2296).
